

Professional Summary

- **11.10+ years** of IT experience in Software Design, Development of various client/server and web based Enterprise Applications using different tools and technologies.
- Experience in product development **from Scratch, POC's**.
- Expertise in working with **Angular14, HTML, JavaScript, jQuery, and Ajax**.
- Expertise in using **Core Java**.
- Strong Experience in **Java 8, 11, 17** with **Object Oriented Programming Concepts (OOPS)**.
- Working experience of **MVC architecture** with **Spring Boot, Spring 3, Struts 2, Struts 1.x, and JSF**.
- Experience in working with **Micro services, and Rest API Services**
- Experience in unit testing using **Jasmine for UI and Junit for BE**.
- Experience in Cloud Technologies like **AWS and Azure**
- Experience in Designing **Single Sign On** using **Azure Active Directory** and **Spring Security** based on **LDAP users**.
- Experience in build tools **Apache Maven, Ant** and **Gradle** and Deployment tool **Jenkins** and **CI/CD** pipelines.
- Expertise in building **PL/SQL, and SQL queries**
- Experience in **Hibernate ORM Tool** and **Spring Data JPA**
- Experience Relational Database like **MS SQL Server, PostgreSQL, Oracle, DB2, and My SQL**.
- Working experience as an **Individual Contributor** and following **Agile Scrum** Methodology.
- Working experience in **Enterprise** applications for processing Fraud check out of lakhs of data.
- Experience with **Application Servers** and **Web servers** using **IBM WebSphere, JBoss, and Apache Tomcat**.
- Experience with IDE tools **IntelliJ, Eclipse** and also with **version controls** like **SVN, Git hub, and Microsoft Git**.
- Possess excellent analytical, problem solving, critical thinking, communication and presentation skills, good estimation skills on requirements and adhere to strict deadlines.
- Actively collaborate with the **UP-stream** and **downstream** applications and DB teams for fixing the issues.

Domains

Banking, Energy, and Pharmaceutical domains.

Skills

Primary Skills	JAVA 8, Spring, Spring Boot, Angular 6 to 14 and AWS
Category	JQuery, TypeScript, Javascript, Html, CSS, Java 17, Spring Core, Spring Boot, Spring JDBC Template, Spring JPA, Hibernate, Junit, Sonarqube, JIRA, Optimise the SQL Queries, PL/SQL
Sub Skills	JavaScript, JQuery, and Ajax, Struts 2, JSF, Hibernate, Microservices, MS SQL, PostgreSQL, J-Meter, Oracle, DB2, and My SQL, Git, SVN, Bit bucket, Maven, Ant, IntelliJ, Eclipse, and NetBeans, WebSphere, JBoss, Apache Tomcat, Sun Application Server, Agile and Waterfall

Projects

Project Profile : Continuous Governance and Confluence, Santander		Technical Analyst
Project Type	Web-based application and Back end Micro Services	
Project Domain	Banking	
Client	Santander	

Duration	Aug 22 to till date	
Location	Hyderabad	
Team Size	Project : 7	Module : 8
Technologies	Java1.17 and 1.8, Spring Boot 3.x.x, Angular14, NodeJs, Jasmine, JUnit, Maven, PostgreSQL, MySQL, Confluence Rest API, SQL Queries, PL/SQL, and Bat script	
Project Overview:	<p>1) Design Web based applications UI Angular and BE Spring Boot with Three Micro Services for Governance Control Centre. It maintains the information flows between agile product teams, change governors and senior decision makers (PIM)</p> <p>2) Designed Desktop based applications for creating Confluence pages based on excel data and extract files, and Json file from JSON Response.</p>	
Roles & Responsibilities	<ul style="list-style-type: none"> Develop the web-based and desktop applications using Spring Boot 3.1.2 and Angular 14 Developed Spring Boot Desktop App and DB. Design the MYSQL Database, and PL/SQL. Involved in code review, performance testing, test case for UI and BE etc. Participates in client calls and gathering requirements, prepare documentation, identifying risks, providing alternative solutions, creates POC's, writing J-Unit etc. Participates sprint review calls with clients and explain what we done within the sprint. Interacting with DB team and explain the requirement clearly to handle the data efficiently. Mentoring and guiding team 	

Project Profile : Global UI and Service, IHSM		Tech Lead
Project Type	Web application and Rest API (Micro Services)	
Project Domain	Energy	
Client	IHS Markit	
Duration	May 18 to Aug 22	
Location	Hyderabad	
Team Size	Project : 12	Module : 8
Technologies	Angular8 to 11, Java1.8, Spring Boot, Junit, Microservices, Maven, NodeJs, JSF, Docker, MS SQL, PostgreSQL, Denodo, AWS(ECS Fargate, S3 Bucket, CI/CD and Lambda) , Azure Boards, IBM FileNet, Struts2, Rest Services, TeraForms, WebSphere, Apache Tomcat, Python, Azure Git, IntelliJ, Pycharm, DB Grid, J-Meter, JUNIT-Mock, SonarQube, OCR and DBVeawer	
Project Overview:	System maintain Oil & Gas related document and users validate and moved one queue to another queue	

Roles & Responsibilities	<ul style="list-style-type: none"> Develop the Web based applications for the validating and processing the oil and gas doc. Developed Spring Boot Apps and Microservices APIs on Top of AWS S3, APIs, and DB. Design UI apps by using Angular and Python applications and fixing Production issues. Design the MSSQL and PostgreSQL Database, and PL/SQL. Design docker containers for schedulers, apps, and deploy in the AWS ECS and Lambda. Involved in code review, performance testing, deployment, test case, and load testing etc. Participates in client calls and gathering requirements, prepare documentation, identifying risks, providing alternative solutions, creates POC's, integrate J-Meter etc. Implemented Single Sign on using Azure Active Directory Designed Spring Security based on LDAP users. Participates sprint review calls with clients and explain what we done within the sprint. Interacting with testing team to explain the requirement clearly and help them in testing the application thoroughly. Mentoring and guiding team. Follows complete Agile Methodology.
-------------------------------------	--

Project Profile : STEP and FIA, SunTrust Bank			Application Developer
Project Type	Web application and Soap API		
Project Domain	Banking		
Client	SunTrust Bank, USA		
Duration	Nov 14 to May 18		
Location	Hyderabad		
Team Size	Project : 22	Module : 5	
Technologies	Java, Spring, Spring Boot, Struts2, Hibernate, Angular, Tepstry, JSF, Oracle, DB2, MS SQL, Fortify, Splunk, Jenkins, Jira, Git, Web Services, Maven, Eclipse, WebSphere and Apache Tomcat		
Project Overview:	System receives Suspected Check from Xerox and users are verify account and checks info with different app and proceeds further.		
Roles & Responsibilities	<ul style="list-style-type: none">• Develop the Web application for Check validation Spring, Hibernate and Tepstry framework.• Develop the backed scheduler and setup the cron jobs for auto execution.• Preparing test case for new changes, production issue fixes and security vulnerabilities.• Involved DB changes and Optimised PL/SQL queries.• Integrating Web Service for additional account info as part of upgrade application.• Working enterprise-level applications like Fraud check to verify with different systems.• Monitoring Splunk, Dynatrace Tool for find the performance issues.• Participated in technical discussions, requirement gathering and deployment calls.• Following Agile and water-fall Methodologies.		

Client : Bloomedha Product for Pharmaceutical Labs		Software Engineer
Project Type	Web application and Soap API Service	
Project Domain	Pharmaceutical	

Client	Life Science and Vimta Labs	
Duration	Jun 11 to Aug 13	
Location	Hyderabad	
Team Size	Project : 12	Module : 4
Technologies	Java, Servlet, Swings, JSP, JDBC, Struts2, Hibernate, Javascript, MYSQL, BIRT, Eclipse, Tomcat, and Sun Application Server	
Role		
Project Overview:	System maintain Voluntaries Info for Pharmaceutical companies.	
Roles & Responsibilities	<ul style="list-style-type: none"> • Developed web application for the pharmaceutical clients. • Involved technical and requirement gathering discussions. • Involved to designed UI, UI validations, Services APIs, and DB changes. • Performing Unit Test and design test-cases. • Design the BIRT-Reports. • Updates the daily status to Superior. 	

Experience Details

- Currently Working with Coforge as **Technical Analyst** from **Aug'22** to till date.
- Cyient Limited as **Tech Lead** from **May'18** to **Aug'22**
- IBM India as **Application Developer** from **Nov'14** to **May'18**
- Bloomedha Info Solutions as **Software Engineer** from **Jun'11** to **Aug'13**

Educational Qualifications

- **MCA** from JNTU(H) University – 2010 with **76%**
- **Degree** from Osmania University – 2007 with **71%**
- **Intermediate** from Triveni Junior College, Suryapet – 2004 with **81.6%**
- **High School** from ZPHS, Yandlapally – 2002 with **72%**

Personal Details

Name	Janaiah Kaatla
Address	New MIG, BHEL, Hyderabad – 502032
